VOLUME 14 1985

SUBJECT INDEX

Absorbed food, 595
  body weight
  eating
  small intestine
Acarbose, 569
  blood glucose
  gastric fistula
  sham feeding
Acetylcholinesterase staining, 9
  colchicine neurotoxicity
  lesions, dentate granule cells
  reactive sprouting
Adrenalectomy, 625
  caloric regulation
  obesity
  protein regulation
Adrenal medulla, 15
  serotonin
  postnatal development
Aging, 397
  methylmercury
  nucleic acids
  proteins
Amino acid release, 439
  ethanol
  monoamine release
  striatum
  transmitter release
Amygdala, 5
  immobilization
  kindling
  stress
  ulcer
Amygdala development, 159
  basolateral amygdala
  kittens
  morphometry
Amygdaloid central nucleus, 331
  electrophysiology
  rabbits
Anabolic hormones, 537
  body weight regulation
  dorsomedial nucleus
  ventromedial nucleus
Anatomical analysis, 477
  micro push-pull catheter
  neurotransmitter recovery
  push-pull perfusion
Angiotensin II
  binding sites, 409
  blood pressure, 307
  hypothalamus, 211
  iontophoresis, 211
  NG108-15 hybrid cells, 409
  oxytocin, 211
  route of administration, 307
  subfornical organ, 307
  vasopressin, 211
  volemia, 307
Anorectic agents, 657
  eating
  human studies
  naltrexone
  obesity
Anterograde degeneration methods, 55
  efferents
  salmons
  supracommissural ventral telencephalon
Anterograde HRP transport, 143
  limbic projections
  paraventricular nucleus
Antipyresis, 113
  thermoregulation
  vasopressin
Apparatus
  computer, 105
  driven shield, 103
  recording chamber, 197
Area postrema, 169
  brainstem
  emesis
  motion sickness
  muscarinic cholinergic receptors
Arousal, 205
  inbred mice
  neocortical spindles
Aversion, 423
  evoked potentials
  human studies
  lesions, thalamus
  pain
Axon collaterals
  electrophysiology, 123
  hypothalamus, 123
  immunocytochemistry, 123
  mamillary nuclei, 453
  paraventricular nucleus, 123
  transnuclear transport, 453
Axonal branching, 443
  cardiopulmonary nerves
  dogs
  fluorescent tracers
Axonal sprouting, 339
  ethanol
  fetal alcohol syndrome
  lesions, dentate gyrus

Basolateral amygdala, 159
  amygdala development
  kittens
  morphometry
Benzodiazepine receptor heterogeneity, 189
  flunitrazepan binding
  photolysis
  temperature
Binding sites, 409
  angiotensin II
  NG108-15 hybrid cells
Binge eating, 673
  obesity
  opioids
  sugar
Blood glucose
  acarbose, 569
  eating, 605
  gastric fistula, 569
  glucostatic hypothesis, 605
  meal initiation, 605
  meal pattern, 605
  sham feeding, 569
Blood pressure
  angiotensin II, 307
  hypertension, 227
  medulla oblongata, 227
  route of administration, 307
  subfornical organ, 307
  vasopressin, 227
  volemia, 307
Body temperature, 323
  morphine
  sex differences
  strain differences
Body weight
  absorbed food, 595
  eating, 427, 595, 663
  hamsters, 427
  high-fat diet, 427
  opioids, 663
  paraventricular nucleus, 427
  photoperiod, 427
  small intestine, 595
Body weight regulation, 537
  anabolic hormones
  dorsomedial nucleus
  ventromedial nucleus
Bovine cerebellum, 469
  cerebellar glomeruli
  serotonin uptake
Brain
  adrenal medulla, 15
  amygdala, 5, 103, 143, 159, 331
  arcuate nucleus of the hypothalamus, 369
  area postrema, 169
  basal forebrain, 63
  basolateral nucleus, 159
  bed nucleus of the stria terminalis, 217
  brainstem, 169, 227, 397, 453
  brainstem neurones, 25
  cardiopulmonary nerves, 443
  caudate nucleus, 133
  central nervous system, 287
  cerebellum, 469
  cerebral arteries, 179
  cerebral cortex, 307
  dentate granule cells, 9
  dentate gyrus, 315, 339
  diencephalon, 143
  dorsal motor nucleus, 49
  dorsal root afferents, 377
  dorsolateral tegmental nucleus, 63
  dorsomedial nucleus, 537
  entorhinal cortex, 339
  forebrain, 55
  globus pallidus, 251
  hippocampus, 9, 307, 315
  hypoglossal nucleus, 49
  hypothalamus, 85, 103, 123, 143, 211, 217, 297, 431, 505, 521, 585, 617
  interpeduncular nucleus, 63
  intralaminar nuclei, 287

lateral hypothalamus, 521
lateral nucleus, 159
lateral preoptic area, 55
lateral septum, 143
mamillary nuclei, 453
medial habenula, 63
medial preoptic nucleus, 261
medial septum, 315
medulla oblongata, 227
mesencephalon, 485
midbrain, 55, 397, 439
middle cervical ganglion, 443
motoneurons, 377
motor cortex, 39
nucleus accumbens, 401, 617
nucleus of the solitary tract, 49
nucleus periventricularis, 307
nucleus triangularis septi, 307
olfactory bulb, 55, 233
paraventricular area, 401, 427
paraventricular hypothalamus, 551
paraventricular nucleus, 123, 143, 521, 561
phrenic nucleus, 39
posterior fossa, 97
preoptic area, 217, 401
pyramidal cells, 315
sphenopalatine ganglion, 179
spinal cord, 377
stellate ganglion, 443
striatum, 91, 439
subfornical organ, 307
subiculum, 401
substantia nigra, 91, 287, 349
superior cervical ganglion, 97
suprachiasmatic nucleus, 143
supraoptic nucleus, 143
sympathetic nervous system, 505
tegmentum, 453
telencephalon, 55
thalamus, 223, 423, 453
trigeminal neuron, 273
ventral mesencephalic tegmentum, 315
ventral subiculum, 143
ventral tegmentum, 485
ventromedial hypothalamus, 521, 551
ventromedial nucleus, 133, 537
ventromedial thalamus, 287
Brain catecholamines, 617
glucoprivic feeding
glucose tolerance
ketones
turnover
Brain slice, 197
in vitro recording
perfusion system
recording chamber
Brainstem, 169
area postrema
emesis
motion sickness
muscarinic cholinergic receptors
Brainstem neurones, 25
cats
horseradish peroxidase
thoracic respiratory motoneurones
Brown adipose tissue, 585
knife-cuts, hypothalamus
obesity
thermogenesis
Brown fat, 577
energy expenditure
obesity
oxygen consumption
thermogenesis
Calcium influx, 369
excitotoxins
neuronal necrosis
neurotoxic mechanism
Caloric regulation, 625
adrenalectomy
obesity
protein regulation
Carbohydrate ingestion, 561
norepinephrine
nutrients
paraventricular nucleus
Cardiopulmonary nerves, 443
axonal branching
dogs
fluorescent tracers
Cats
brainstem neurones, 25
cervical nerve afferents, 97
cranial nerve afferents, 97
electrical brain stimulation, 217
evoked potentials, 223
flight behavior, 217
horseradish peroxidase, 25, 39
human studies, 223
late positive component, 223
limbic striatum, 239
morphine, 239
NE receptors, 239
phrenic nucleus, 39
posterior fossa, 97
thalamus, 223
thoracic respiratory motoneurones, 25, 39
Cerebellar glomeruli, 469
bovine cerebellum
serotonin uptake
Cerebral arteries, 179
cholinergic nerves
coexistence
vasoactive intestinal polypeptide
Cervical nerve afferents, 97
cats
cranial nerve afferents
posterior fossa
ChAT immunohistochemistry, 63
fluorescent tracers
interpeduncular nucleus
Cholinergic nerves, 179
cerebral arteries
coexistence
vasoactive intestinal polypeptide
Coexistence, 179
cerebral arteries
cholinergic nerves
vasoactive intestinal polypeptide
Colchicine neurotoxicity, 9
acetylcholinesterase staining
lesions, dentate granule cells
reactive sprouting
Computers, 105
data acquisition
interface
interspike interval
Corticotropin releasing factor, 511
eating
neuromodulators
Cranial nerve afferents, 97
cats
cervical nerve afferents
posterior fossa
Cultured neurons, 415
electron microscopy
insulin receptors
light microscopy
Data acquisition, 105
computers
interface
interspike interval
Dendrites, 485
fluorescence histochemistry
Golgi-Cox impregnation
mesencephalon development
rabbit
ventral tegmental area
Deprivation, 233
olfactory system
plasticity
Dogs, 443
axonal branching
cardiopulmonary nerves
fluorescent tracers
Dorsal motor nucleus, 49
GABA
hypoglossal nucleus
neurochemistry
nucleus of the solitary tract
Dorsal root afferents, 377
larval bullfrogs
motoneurons
spinal cord
Dorsomedial nucleus, 537
anabolic hormones
body weight
ventromedial nucleus
Drinking
hypothalamus, 521
neuropeptide Y, 521
Driven shield, 103
iontophoretic application
multi-barrel electrode
single neuron activity
Drug
acarbose, 569
acetoacetate, 617
butanediol, 617
calcium, 369
chloroethyl clonidine, 493
CL 218,872, 189
cocaine, 493
colchicine, 315
2-deoxy-D-glucose, 617
3-deoxypentonate, 431
2-deoxytetronate, 431
desipramine, 493
diaminobenzidine, 277
dibenamine, 493
[^{3}H]dihydromorphine, 301
5,7-dihydroxytryptamine, 643
[^{3}H]diprenorphine, 301
DOPAC, 85
dopamine, 15, 85
DSP4, 493
epinephrine, 15, 85
ethanol, 339, 439
[^{3}H]ethylketocyclazocine, 301
flunitrazepam, 189
fructose, 617
glutamate, 369
haloperidol, 117
hydroxybutyrate, 617
insulin, 505, 617
kainic acid, 315, 369
LiCl, 529
N-methylaspartate, 369
methylmercury, 397
mianserine, 117
morphine, 239, 251, 323, 681
naloxone, 681
naltrexone, 657

nimodipine, 369
norepinephrine, 15, 85, 561
pentylenetetrazol, 205
phenoxybenzamine, 493
propranolol, 205
saccharin, 569
soman, 117
^{3}H-spiperone, 117
sucrose, 569
tetramethylbenzidine, 277
Δ^9-THC, 85
xylamine, 493
DSP4, 493
noradrenergic neurotoxins
opiate receptors
xylamine

Eating
absorbed food, 595
anorectic agents, 657
blood glucose, 605
body weight, 427, 595, 663
endogenous sugar acids, 431
gastric acid secretion, 431
gastric emptying, 687
genetic obesity, 505, 633
glucocorticoids, 505
glucoregulation, 687
glucostatic hypothesis, 605
hamsters, 427
high-fat diet, 427
human studies, 657
hyperphagia, 633
hypothalamic neuron activity, 431
hypothalamus, 521
leeches, 643
lipid deposition, 633
meal initiation, 605
meal pattern, 605
naltrexone, 657
neuromodulations, 511
neuropeptide Y, 521
nutrient composition, 633
obesity, 657
opioids, 663
opioid systems, 681
paraventricular nucleus, 427
photoperiod, 427
satiety, 687
serotonergic modulation, 643
slugs, 681
small intestine, 595
stress, 681
ventromedial hypothalamus, 505
Efferents, 55
anterograde degeneration methods
salmons
supracommissural ventral telencephalon
Electrical brain stimulation, 217
cats
flight behavior
Electron microscopy
cultured neurons, 415
insulin receptors, 415
light microscopy, 415
tetranethylbenzidine, 277
Electrophoretic application, 133
immunological study
rabbits
ventromedial nucleus
Electrophysiology
amygdaloid central nucleus, 331
axon collaterals, 123
hypothalamus, 123
immunocytochemistry, 123
nucleus accumbens, 401
paraventricular area, 401
paraventricular nucleus, 123
photic stimulation, 401
preoptic area, 401
rabbits, 331
sciatic nerve, 401
subiculum, 401
Emesis, 169
area postrema
brainstem
motion sickness
muscarinic cholinergic receptors
Endogenous sugar acids, 431
eating
gastric acid secretion
hypothalamic neuron activity
Energy expenditure, 577
brown fat
obesity
oxygen consumption
thermogenesis
Enkephalin, 251
globus pallidus
inhibition
morphine
Ethanol
amino acid release, 439
axonal sprouting, 339
fetal alcohol syndrome, 339
monoamine release, 439
striatum, 439
transmitter release, 439
Evoked potentials
aversion, 423
cats, 223
human studies, 223, 423
late positive component, 223
lesions, thalamus, 423
pain, 423
thalamus, 223
Excitotoxins, 369
calcium influx
neuronal necrosis
neurotoxic mechanism

Fetal alcohol syndrome, 339
axonal sprouting
ethanol
lesions, dentate gyrus
Flavor associations, 529
satiety
self-selection
sham feeding
toxicosis
Flight behavior, 217
cats
electrical brain stimulation
Flunitrazepam binding, 189
benzodiazepine receptor heterogeneity
photolysis
temperature
Fluorescence histochemistry, 485
dendrites
Golgi-Cox impregnation
mesencephalon development
rabbit
ventral tegmental area
Fluorescent tracers
axonal branching, 443
cardiopulmonary nerves, 443
ChAT immunohistochemistry, 63
dogs, 443
interpeduncular nucleus, 63
Free feeding, 693
meal patterns
regulation
satiety

GABA, 49
dorsal motor nucleus
hypoglossal nucleus
neurochemistry
nucleus of the solitary tract
Ganglioside GMI, 91
neurotrophic agents
substantia nigra grafts
trophic substances
Gastric acid secretion, 431
eating
endogenous sugar acids
hypothalamic neuron activity
Gastric emptying, 687
eating
glucoregulation
satiety
Gastric fistula, 569
acarbose
blood glucose
sham feeding
Genetic obesity
eating, 505, 633
glucocorticoids, 505
hyperphagia, 633
lipid deposition, 633
nutrient composition, 633
ventromedial hypothalamus, 505
Globus pallidus, 251
enkephalin
inhibition
morphine
Glucocorticoids, 505
eating
genetic obesity
ventromedial hypothalamus
Glucoprivic feeding, 617
brain catecholamines
glucose tolerance
ketones
turnover
Glucose regulation, 687
eating
gastric emptying
satiety
Glucose tolerance, 617
brain catecholamines
glucoprivic feeding
ketones
turnover
Glucostatic hypothesis, 605
blood glucose
eating
meal initiation
meal pattern
Golgi-Cox impregnation, 485
dendrites
fluorescence histochemistry
mesencephalon development
rabbit
ventral tegmental area
GTP, 301
guanyl nucleotides
κ-opioid binding
Guanyl nucleotides, 301
GTP
κ-opioid binding

Hamsters, 427
body weight
eating
high-fat diet
paraventricular nucleus
photoperiod
High-fat diet, 427
body weight
eating
hamsters
paraventricular nucleus
photoperiod
High performance liquid chromatography, 85
plasma catecholamine levels
Δ^9THC
Histological atlas, 349
monkeys
substantia nigra
ventricular coordinates
Hormone
corticosterone, 625
corticotropin releasing factor, 511
insulin, 529
luteinizing hormone, 493
Hormones, 525
integrative peptides
neurotransmitters
Horseradish peroxidase
brainstem neurones, 25
cats, 25, 39
phrenic nucleus, 39
thoracic respiratory motoneurones, 25, 39
Hyperactivity, 315
lesions, hippocampus
non-operant behavior
operant behavior
Hyperphagia, 633
eating
genetic obesity
lipid deposition
nutrient composition
Hypertension, 227
blood pressure
medulla oblongata
vasopressin
Hypertrophy, 297
lesions, hypothalamus
Hypoglossal nucleus, 49
dorsal motor nucleus
GABA
neurochemistry
nucleus of the solitary tract
Hypothalamic neuron activity, 431
eating
endogenous sugar acids
gastric acid secretion
Hypothalamus
angiotensin II, 211
axon collaterals, 123
drinking, 521
eating, 521
electrophysiology, 123
immunocytochemistry, 123
iontophoresis, 211
neuropeptide Y, 521
oxytocin, 211
paraventricular nucleus, 123
vasopressin, 211
Human studies
anorectic agents, 657
aversion, 423
cats, 223
eating, 657
evoked potentials, 223, 423
late positive component, 223
lesions, thalamus, 423
naltrexone, 657
obesity, 657
pain, 423
thalamus, 223

Immobilization, 5
amygdala
kindling
stress
ulcer
Immunocytochemistry, 123
axon collaterals
electrophysiology
hypothalamus
paraventricular nucleus
Immunological study, 133
electrophoretic application
rabbits
ventromedial nucleus
Inbred mice, 205
arousal
neocortical spindles
Inhibition, 251
enkephalin
globus pallidus
morphine
Insulin receptors, 415
cultured neurons
electron microscopy
light microscopy
Integrative peptides, 525
hormones
neurotransmitters
Interface, 105
computers
data acquisition
interspike interval
Interpeduncular nucleus, 63
ChAT immunohistochemistry
fluorescent tracers
Interspike interval, 105
computers
data acquisition
interface
In vitro recording, 197
brain slice
perfusion system
recording chamber
Iontophoresis, 211
angiotensin II
hypothalamus
oxytocin
vasopressin
Iontophoretic application, 103
driven shield
multi-barrel electrode
single neuron activity

Ketones, 617
brain catecholamines
glucoprivic feeding
glucose tolerance
turnover
Kindling, 5
amygdala
immobilization
stress
ulcer
Kittens, 159
amygdala
basolateral amygdala
morphometry
Knife-cuts, hypothalamus, 585
brown adipose tissue
obesity
thermogenesis

Larval bullfrogs, 377
dorsal root afferents
motoneurons
spinal cord
Late positive component, 223
